Protecting Devices Against Viruses Using Open Source Software

Anti-virus software is one of the main pillars of protection for data and personal information. If you are unwilling or incapable of buying commercial software, do not hesitate to look online for available free software, such as:

	<p>ClamAV g ClamWin وهو برنامج مكافحة فيروسات مفتوح المصدر ومجاني https://clamav.net/downloads</p>
	<p>Gateway Antivirus a software that expands ClamAv services for small and medium-sized enterprises https://gatewayav.sourceforge.net</p>
	<p>AVG free A free version of the antivirus software https://avg.com/en-us/free-antivirus-download</p>
	<p>Avira Free A free version of the antivirus software https://avira.com</p>
	<p>Comodo Free A free version of the antivirus software https://antivirus.comodo.com</p>
	<p>Avast free A free version of the antivirus software https://avast.com/free-antivirus-download</p>
	<p>Panda Free A free version of the antivirus software https://pandasecurity.com/en/homeusers/free-antivirus</p>
	<p>Sophos Free A free version of the antivirus software https://home.sophos.com/en-us/free-anti-virus-windows.aspx</p>
	<p>Kaspersky free A free version of the antivirus software https://kaspersky.com/free-antivirus</p>
